CAREER OBJECTIVE

Junior Full Stack Developer with hands-on experience building and deploying complete web applications end to end, from the user interface to secure APIs and databases. Experienced in debugging issues across independently deployed frontend and backend services, with a strong problem-solving background from competitive programming. Looking for an entry-level Full Stack Developer role where I can learn from senior developers, contribute to real-world projects, and keep growing as an engineer.

TECHNICAL SKILLS

Programming Languages: C, C++, Python (basic), Java (basic)

Core Concepts: Object-Oriented Programming (basic), Data Structures & Algorithms (basic), Agile/Scrum (basic)

Frontend: HTML5, CSS3, Tailwind CSS, React, Next.js, JavaScript (ES6+), TypeScript (learning)

Backend: Node.js, Express.js, REST API Design, Third-Party API Integration (Stripe), Authentication (Better Auth, JWT), Role-Based Access Control (RBAC)

Database & Tools: MongoDB, MySQL, Git, GitHub, VS Code, Vercel, Netlify

PROJECTS (FULL STACK)

StartupForge – Startup **Live Demo | Frontend | Backend**

- Designed and built the Node.js/Express backend authorization layer with role-based access control across Founder, Collaborator, and Admin roles, ensuring each role's API access matched its permissions.
- Built a subscription-based payment system with Stripe on the backend, with tiered pricing plans, handling plan upgrades and gating access based on subscription status.
- Implemented secure authentication end to end (JWT token generation and verification, HTTPOnly cookie storage) and syncing user roles between backend and frontend routes.

Tech: HTML, CSS, Next.js, Node.js, Express.js, MongoDB, Stripe, Better Auth, JWT, RBAC, Git, Vercel

Pet Adoption Platform **Live Demo | Frontend | Backend**

- Built and deployed a separate Express/MongoDB backend API alongside the Next.js frontend, architecting the two as independent, communicating services.
- Resolved cross-origin (CORS) issues between the independently deployed frontend and backend, configuring the API to safely accept requests from the production frontend domain.
- Debugged environment-variable and API base-URL mismatches between local and production environments, ensuring the Owner and User dashboards worked correctly after deployment.

Tech: HTML, CSS, Next.js, Node.js, Express.js, MongoDB, Better Auth, JWT, Git, Vercel

EDUCATION

Dhaka International University 2023 - Present

BSc in Computer Science & Engineering (4th Year) | CGPA: 3.36

ACHIEVEMENTS & CERTIFICATIONS

- Competitive Programming — active on Codeforces (**Codeforces profile**)
- Complete Web Development Course — Programming Hero (**Certificate**) — Batch 13, September 2026

LANGUAGES

Bengali - Native | English - Intermediate
